CONTENTS

Volume 17 — 1973

Pages

ADAMS, J. F., Chern characters revisited 333–336

ALI, M. SHAFQAT, with MARCUS, MARVIN, Images of bilinear symmetric and skew-symmetric functions 505–512

ANDERSON, BILL D., Projections and extension maps in $C(T)$ 513–517

ARIBAUD, FRANCOIS, Sur la moyenne temporelle d'un système dynamique 90–110

BERNARD, JACQUES et LETAC, GÉRARD, Construction d'évènements équiprobables et coefficients multinomiaux modulo p^n 317–332

BROOKS, JAMES K. and REICHELDERFER, PAUL V., On absolutely continuous transformations for measure spaces 167–176

DADE, E. C., Block extensions 198–272

DANCIS, JEROME and LUSK, EWING, Embeddings of bounded topological manifolds 498–504

DAVIS, BURGESS, Moments of random walk having infinite variance and the existence of certain optimal stopping rules for S_n/n 75–81

DEMPWOLFF, ULRICH, Zentralisatoren zentraler involutionen in $L_n(2)$ 465–497

DOWSON, H. R., A commutativity theorem for prespectral operators. 525–532

DUVALL, P. F., JR., and HUSCH, L. S., Regular properly discontinuous Z^n-actions on open manifolds 290–300

FRIED, MICHAEL, The field of definition of function fields and a problem in the reducibility of polynomials in two variables 128–146

GIAMBALVO, V., Cobordism of line bundles with a relation 442–449

GILMAN, ROBERT, A combinatorial identity with applications to representation theory 347–351

GRADDON, C. J., $\mathfrak{F}$-speed, $\mathfrak{F}$-abnormal depth and $(R, \mathfrak{F})$-chains in certain locally finite groups 646–665

———, Some generalizations, to certain locally finite groups, of theorems due to Chambers and Rose 666–679

HAGOPIAN, CHARLES L., An arc theorem for plane continua 82–89

HILTON, PETER, MISLIN, GUIDO and ROITBERG, JOSEPH, Note on a criterion of Scheerer 680–688

HUSCH, L. S., with DUVALL, P. F., JR., Regular properly discontinuous Z^n-actions on open manifolds 290–300

ITO, TAKASHI and WONG, TIN KIN, A continuous lower estimate for the distance between an operator and compact perturbations of normal operators 337–345

JANAKIRAMAN, S. and RAJAGOPALAN, M., Topologies in locally compact groups II 177–197

JENKINS, JAMES A. and SUITA, NOBUYUKI, On regular functions on Riemann surfaces 563–570

KAPLAN, SAMUEL, The unbounded bidual of $C(X)$ 619–645

LANDWEBER, PETER S., Annihilator ideals and primitive elements in complex bordism 273–284

LARMORE, L. L. and THOMAS, E., Group extensions and twisted cohomology theories 397–410

LETAC, GÉRARD, avec BERNARD, JACQUES, Construction d'évènements équiprobables et coefficients multinomiaux modulo p^n ... 317–332

LIEBERMAN, ARTHUR, Continuous representations of infinite symmetric groups on reflective Banach spaces 450–457

LUSK, EWING, with DANCIS, JEROME, Embeddings of bounded topological manifolds 498–504

MACDONALD, ALAN L., Vector valued Köthe function spaces I 533–545

———, Vector valued Köthe function spaces II 546–557

MARCUS, MARVIN and ALI, M. SHAFQAT, Images of bilinear symmetric and skew-symmetric functions 505–512

MCDONALD, JOHN N., Isometries of function algebras 579–583

MILES, JOSEPH, Zero sets in $H^p(U^n)$ 458–464

MISLIN, GUIDO with HILTON, PETER and ROITBERG, JOSEPH, Note on a criterion of Scheerer 680–688

MORRIS, ROBERT A., Cohomology of inseparable field extensions 571–578

PETERSON, BRUCE B., Intersection properties of curves of constant width 411–420

RAJAGOPALAN, M., with JANAKIRAMAN, S., Topologies in locally compact groups II 177–197

REICHELDERFER, PAUL, with BROOKS, JAMES K., On absolutely continuous transformations for measure spaces 167–176

ROELCKE, W., On the behavior of linear mappings on absolutely convex sets and A. Grothendieck's completion of locally convex spaces 311–316

ROELING, LLOYD G., The genus of an orientable 3-manifold with connected boundary 558–562

ROITBERG, JOSEPH with HILTON, PETER and MISLIN, GUIDO, Note on a criterion of Scheerer 680–688

RYAVEC, C., The analytic continuation of Euler products with applications to asymptotic formulae 608–618

SILVERSTEIN, MARTIN L., Dirichlet spaces and random time change 1–72

SMITH, FREDERICK L., Finite groups whose Sylow 2-subgroups are the direct product of a dihedral and a semi-dihedral group 352–386

———, Groups whose Sylow subgroups are the direct product of two semi-dihedral groups 387–396

SMITH, LARRY, A note on the Stong-Hattori theorem 285–289

———, The Todd character and the integrality theorem for the Chern character 301–310

SOLAZZI, ROBERT E., The automorphisms of the unitary groups and their congruence subgroups 153–165

SPENCE, LAWRENCE E., On the image of $S^p \times S^q$ under mappings of degree one 111–114

SPIRA, ROBERT, Zeros of $\zeta'(s)$ and the Riemann hypothesis 147–152

STAMPFLI, JOSEPH G., Derivations on $\mathfrak{B}(\mathfrak{H})$: The range 518–524

STARK, BETTY SALZBERG, Some subgroups of $\Omega(V)$ generated by groups of root type 1 584–607

SUITA, NOBUYUKI with JENKINS, JAMES A., On regular functions on Riemann surfaces 563–570

THOMAS, E., with LARMORE, L. L., Group extensions and twisted cohomology theories 397–410

WALKER, CAROL L., Projective classes of cotorsion groups 689–706

WATERHOUSE, WILLIAM C., A non-criterion for central simple algebras 73–74

WESTERBECK, KENT E., and WU, TA-SUN, The equicontinuous structure relation for ergodic abelian transformation groups 421–441

WILSON, W. STEPHEN, A new relation on the Stiefel-Whitney classes of spin manifolds 115–127

WONG, TIN KIN, with ITO, TAKASHI, A continuous lower estimate for the distance between an operator and compact perturbations of normal operators 337–345

WU, TA-SUN, with WESTERBECK, KENT E., The equicontinuous structure relation for ergodic abelian transformation groups 421–441
